Subject Index of Volume 23

Acid rain resistance
recent developments in crosslinking technology for coating resins, 325
Acid resistance
thermal cationic curing by benzylpyridinium salts, 379
A.c. impedance measurements
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Acrylic latex
drying behavior of acrylic latexes, 387
Activation energy
the influence of temperature on dielectric loss in organic coatings, 265
Adhesion
chlorinated resins and polymers: a survey of the present state, 155
Adhesion loss
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Adhesive-bonded cans
the role of primers in the 'adhesive-bonded can', 23
Aminoplast
recent developments in crosslinking technology for coating resins, 325
Anaphoretic coating
colloid-chemical modification of film-forming paint materials, 115

Benzylpyridinium salts
thermal cationic curing by benzylpyridinium salts, 379

Cataphoretic coating
colloid-chemical modification of film-forming paint materials, 115
Cationic curing
thermal cationic curing by benzylpyridinium salts, 379
Cationic mechanisms
synthesis and applications of photo-crosslinkable poly(siloxanes), 201
Chemical degradation
predicting coating durability using chemical methods, 105
Chemical resistance
chlorinated resins and polymers: a survey of the present state, 155
Chlorinated polymers
chlorinated resins and polymers: a survey of the present state, 155
Chlorinated resins
chlorinated resins and polymers: a survey of the present state, 155
Cloud point
a survey of surfactants in coatings technology, 1
Coalescence
drying behavior of acrylic latexes, 387
Coal tar epoxy coating
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275
Coating formulation
predicting coating durability using chemical methods, 105
Coating problems
a survey of surfactants in coatings technology, 1
Coating quality
predicting coating durability using chemical methods, 105
Coatings
impedance study of the corrosion protection properties of fluoropolymer coatings, 73
Coating surface
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287
Color matching
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
Composites
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305
Constant phase element
in situ determination of the loss of adhesion of barrier epoxy coatings

using electrochemical impedance spectroscopy, 89
Contact angle
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287
Corrosion
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Corrosion potential
the use of electrochemical impedance measurements to assess the performance of organic coating systems on naval steel, 185
Corrosion protection
the role of primers in the 'adhesive-bonded can', 23
impedance study of the corrosion protection properties of fluoropolymer coatings, 73
colloid-chemical modification of film-forming paint materials, 115
Corrosion resistance
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Critical micellar concentration
a survey of surfactants in coatings technology, 1
Crosslinking
recent developments in crosslinking technology for coating resins, 325

Dielectrical behaviour
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Dielectric loss
the influence of temperature on dielectric loss in organic coatings, 265
Dielectric sensor
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Dispersion
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305
Drying behavior
drying behavior of acrylic latexes, 387
Durability of cherni
predicting coati

Progress in Organic Coatings, 23 (1994) 409–412

Subject Index of Volume 23

Acid resistance
recent developments in crosslinking technology for coating resins, 325
Acid resistance
thermal cationic curing by benzylpyridinium salts, 379
A.c. impedance measurements
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Acrylic latex
drying behavior of acrylic latexes, 387
Activation energy
the influence of temperature on dielectric loss in organic coatings, 265
Adhesion
chlorinated resins and polymers: a survey of the present state, 155
Adhesion loss
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Adhesive-bonded cans
the role of primers in the 'adhesive-bonded can', 23
Amine blast
recent developments in crosslinking technology for coating resins, 325
Anaphoretic coating
colloid-chemical modification of film-forming paint materials, 115

Benzylpyridinium salts
thermal cationic curing by benzylpyridinium salts, 379

Cataphoretic coating
colloid-chemical modification of film-forming paint materials, 115
Cationic curing
thermal cationic curing by benzylpyridinium salts, 379
Cationic mechanisms
synthesis and applications of photocrosslinkable poly(siloxanes), 201
Chemical degradation
predicting coating durability using chemical methods, 105
Chemical resistance
chlorinated resins and polymers: a survey of the present state, 155
Chlorinated polymers
chlorinated resins and polymers: a survey of the present state, 155
Chlorinated resins
chlorinated resins and polymers: a survey of the present state, 155
Cloud point
a survey of surfactants in coatings technology, 1
Coalescence
drying behavior of acrylic latexes, 387
Coal tar epoxy coating
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275
Coating formulation
predicting coating durability using chemical methods, 105
Coating problems
a survey of surfactants in coatings technology, 1
Coating quality
predicting coating durability using chemical methods, 105
Coatings
impedance study of the corrosion protection properties of fluoropolymer coatings, 73
Coating surface
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287
Color matching
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
Composites
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305
Constant phase element
in situ determination of the loss of adhesion of barrier epoxy coatings

Elsevier Science S.A.

using electrochemical impedance spectroscopy, 89
Contact angle
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287
Corrosion
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Corrosion potential
the use of electrochemical impedance measurements to assess the performance of organic coating systems on naval steel, 185
Corrosion protection
the role of primers in the 'adhesive-bonded can', 23
impedance study of the corrosion protection properties of fluoropolymer coatings, 73
colloid-chemical modification of film-forming paint materials, 115
Corrosion resistance
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Critical micellar concentration
a survey of surfactants in coatings technology, 1
Crosslinking
recent developments in crosslinking technology for coating resins, 325

Dielectrical behaviour
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Dielectric loss
the influence of temperature on dielectric loss in organic coatings, 265
Dielectric sensor
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Dispersion
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305
Drying behavior
drying behavior of acrylic latexes, 387
Durability of chemical coatings
predicting coating durability using chemical methods, 105

Electrochemical impedance
the use of electrochemical impedance measurements to assess the performance of organic coating systems on naval steel, 185
Electrochemical impedance spectroscopy
impedance study of the corrosion protection properties of fluoropolymer coatings, 73
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Electrodeposition
colloid-chemical modification of film-forming paint materials, 115
Electrotechnology
colloid-chemical modification of film-forming paint materials, 115
Epoxy coatings
in situ determination of the loss of adhesion of barrier epoxy coatings using electrochemical impedance spectroscopy, 89
Evaporation
evaporation of solvents by infrared radiation treatment, 351

Film properties
chlorinated resins and polymers: a survey of the present state, 155
Fire retardency
chlorinated resins and polymers: a survey of the present state, 155
Fluoropolymers
impedance study of the corrosion protection properties of fluoropolymer coatings, 73

Glass transition
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287

Hard spheres
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305

High solids
thermal cationic curing by benzylpyridinium salts, 379
Hydrodynamics
the flow of paint coatings: a hydrodynamic analysis, 341
Hydropolymers
impedance study of the corrosion protection properties of fluoropolymer coatings, 73

Impedance relaxation
the influence of temperature on dielectric loss in organic coatings, 265
Impedance spectroscopy
the influence of temperature on dielectric loss in organic coatings, 265
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275
IR drying
evaporation of solvents by infrared radiation treatment, 351

Krafft point
a survey of surfactants in coatings technology, 1
Kubelka–Munk theory
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239

Low temperature cure
recent developments in crosslinking technology for coating resins, 325

Mass transfer coefficients
evaporation of solvents by infrared radiation treatment, 351
Mathematical evaluation
quantitative characterization of spectral ultraviolet radiation-induced photodegradation in coating systems exposed in the laboratory and the field, 49
Metal containers
the role of primers in the 'adhesive-bonded can', 23
Microstructure
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305

Nondestructive testing
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275

Organic coatings
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
the influence of temperature on dielectric loss in organic coatings, 265
Organic solvents
evaporation of solvents by infrared radiation treatment, 351

Paint coatings
the flow of paint coatings: a hydrodynamic analysis, 341
Paint film resistance
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275
Photocrosslinking
synthesis and applications of photocrosslinkable poly(siloxanes), 201
Photodegradation
quantitative characterization of spectral ultraviolet radiation-induced photodegradation in coating systems exposed in the laboratory and the field, 49
Physical property changes
predicting coating durability using chemical methods, 105
Pigment volume concentration
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Poly(isocyanates)
recent developments in crosslinking technology for coating resins, 325
Polymeric film-forming materials
colloid-chemical modification of film-forming paint materials, 115
Poly(siloxanes) curing and synthesis
synthesis and applications of photocrosslinkable poly(siloxanes), 201
Potential–time measurements
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Primers
the role of primers in the 'adhesive-bonded can', 23

Radiative transfer theory
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
Radical mechanisms
synthesis and applications of photocrosslinkable poly(siloxanes), 201
Refractive index
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239

Saunderson equation
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
Scratch resistance
recent developments in crosslinking technology for coating resins, 325
Solvent-based coatings
recent developments in crosslinking technology for coating resins, 325
Surface scattering effects
an analysis of the first surface correction for the color matching of organic coatings from the viewpoint of radiative transfer theory, 239
Surfactant properties
a survey of surfactants in coatings technology, 1
Surfactants
a survey of surfactants in coatings technology, 1
Synthetic seawater
the study of coal tar epoxy protective coatings by impedance spectroscopy, 275

Temperature dependence
determination of the glass transition temperature at polymer surfaces from the temperature dependence of wetting, 287
Thermal annealing
evaporation of solvents by infrared radiation treatment, 351
Thermal cationic curing
thermal cationic curing by benzylpyridinium salts, 379
Total effective dose
quantitative characterization of spectral ultraviolet radiation-induced photodegradation in coating systems exposed in the laboratory and the field, 49

UV radiation
quantitative characterization of spectral ultraviolet radiation-induced photodegradation in coating systems exposed in the laboratory and the field, 49
synthesis and applications of photocrosslinkable poly(siloxanes), 201

Viscosity
effect of microstructure on the viscosity of hard sphere dispersions and modulus of composites, 305

Water absorption rates
evaporation of solvents by infrared radiation treatment, 351
Water-based coatings
recent developments in crosslinking technology for coating resins, 325
Waterborne coatings
evaporation of solvents by infrared radiation treatment, 351

Zinc phosphate inhibitor
the effect of the PVC/CPVC ratio on the corrosion resistance properties of organic coatings, 363
Zinc-rich primer
the use of electrochemical impedance measurements to assess the performance of organic coating systems on naval steel, 185
